

Wizz Family

Wizz Family offers you three family extensions bundled in a single package to suite the telephony needs of your whole family.

Your family can now have their own phone use it at home or carry it with them any where they go.

So now you can get in touch with your family where ever they are just by dialing their extension. Call charges within your family circle will be absolutely free.

All your extensions will be powered with un-matched features to suite your needs;
To name a few;

- **Anonymous Call Blocking**

Anonymous Call Block lets you easily stop those annoying anonymous calls. All calls marked from callers who have deliberately blocked their Caller ID will be sent to a system message indicating that you do not accept anonymous calls. The caller will be directed to hang up and try again with Caller ID unblocked. Callers whose Caller ID information is not available will not be blocked.

- **Do Not Disturb**

Tired of the phone ringing in the middle of your family dinner? With your Wizz phone, you can easily block all incoming calls whenever, wherever, and however you want - Plus, we make it easy for you to turn it on or off as much as you want at no extra charge.

- **Three-Way Calling**

With Wizz Family now you can contact your daddy who is out on a business trip abroad, your child who has entered the med school in USA and mum at home all at once with three-way calling for zero call charges.

More Features to ease your life.....

- **Series Completion**

Now you can even configure your extensions to sit in one single group, where calls coming to one extension can be redirected automatically to the next extension in a round robin fashion if not answered. So your calls will never go un-answered.

- **Call Pickup**

You can pickup a call that was received to one extension from your own extension.

- **Restrict your family's Call Capacity**

You can pre-configure the maximum number of incoming calls and outgoing calls to your family.
